Marine Crystal Video, Contract RD-9[redacted]

1. During the course of the development of the Marine Crystal Video System it became apparent that some of the subassemblies within the system would be applicable to other uses. In particular, the video amplifiers were considered useful for many other applications and consequently, the Naval Research Laboratory was requested to evaluate a sample unit.

2. Two units of the four megacycle preamplifier, as developed by the [redacted], were delivered to the Laboratory for their evaluation. Transmitted herewith are three copies of the report from that examination. 25X1
